REQUEST FOR RECONSIDERATION OF CERTIFICATE OF CORRECTION

On July 15, 2008, Applicant requested a request for certificate of correction in the above-referenced matter. Examiner rejected our request stating that the alleged errors noted in our request do not match claim 29 and that the correction to claim 25 changes the scope of the claim. This revised certificate of correction corrects for the fact that the claims published in the issued patent do not match the allowed claims.

Published claim 29 corresponds to allowed claim 35. Allowed claim 35 is dependent directly on allowed independent claim 27, which corresponds to published independent claim 23. Published dependent claim 28 corresponds to allowed dependent claim 33. None of the allowed claims depends from allowed dependent claim 33. Accordingly, this revised certificate of correction edits published claim 29 to depend from published claim 23 to correct for the publishing error of the U.S. Patent and Trademark Office.

Published dependent claim 25 does not correspond to any of the allowed claims. The published patent also does not include any published claim that corresponds to allowed dependent claim 36. Accordingly, this revised certificate of correction edits replaces published claim 25 with the language of allowed claim 36.

Applicant thus once again requests a certificate of correction be issued for the above patent in accordance with this request. Please contact the undersigned if you believe a more detailed explanation is necessary.
